Latest Project Experience:

A. Project: SoundBNB

URL: https://soundbnb.nyusoft.in/

Description: This website is for booking studio, recording studio, events overnights, video photoshoot. Multiple service types are there. Customer can book based on his requirement. After booking, the messaging system is also there. During booking customers can also choose addons like chef, video girl, camera man etc.

Role: Frontend Developer

Platform: ReactJS

Responsibility:

● Write well designed, testable, efficient code by using best software development practices

● Cooperate with web designers to match visual design intent

● Integrate data from various back-end services and databases

B. Project: Odds Beater

URL: https://oddsbeater.nl/

Description: OddsBeater is the sports betting platform. Here you will find previews, news, strategies, betting tips and everything related to sports betting. Sports betting enthusiasts such as football, tennis, darts, Formula 1 and cycling can now bet legally with licensed bookmakers. OddsBeater helps you make the right choices for your bet and compares bookmakers for you.

Role: Full Stack developer

Platform: ReactJS + NodeJS

Responsibility:

● Write well designed, testable, efficient code by using best software development practices

● Create website layout/user interface by using standard HTML/CSS practices

● Be responsible for maintaining, expanding, and scaling our site

● Integrate data from various back-end services and databases

C. Project: Sales Prospector

URL: https://salesprospector.io/

Description: In this project, we are fetching leads from different types of social platforms like Facebook, LinkedIn, Twitter. Once we fetch those leads then the system has the ability to send

a text message, mail manually, and automated both. Also, we have made task functionality and those tasks are connected with google calendar.

Role: Frontend Developer

Platform: React JS

Responsibility:

● Be responsible for maintaining, expanding, and scaling our site

● Create website layout/user interface by using standard HTML/CSS practices

● Write well designed, testable, efficient code by using best software development practices
